

# How the Eco Friendly Frosty Towel Works:

First we start with a premium cotton towel and natural plant oils and extracts. Cotton works best with all our mixtures and is a natural plant product as well as biodegradable.

We use a natural Alcohol and Menthol mixture. This mixture helps with the cooling and SD Alcohol is known also for preventing and killing germs. This part of the mixture also opens the pores of your skin, and helps evaporation on your body.

We use tropical smelling Lemon Grass and Citronella as natural insect deterrents. These oils are used the world over to keep bugs away. Citronella naturally repels mosquitoes. These can be taking out in some of our other mixtures like cucumber or green tea.

We add other essential oil extracts like Mandarin and Grape Fruit to give the towels a more refreshing tropical scent. They are also great cleaning agents. We also add Glycerin to soften and moisturize the skin.

There are other natural ingredients that we use to help promote the blending of the above and the usefulness of the towels as well as give Forsty Towel a 2 year shelf life.

Finally, all you have to do is open the package and begin wiping down to feel the effects. It is not necessary for the Frosty Towel to be chilled or refrigerate first. Once you have opened the package, wave it in the air, and it is good to go. For the best and longest lasting results you can place the Frosty Towel in a cooler, refrigerator, ice chest, or freezer for up to 30 minutes to 8 hours prior to use. Under normal conditions the Polar Fresh Frosty Towel should last 4 to 8 hours. I keep mine wrapped around my cold drinks in the really hot days of the summer. Put it on the back of your neck for hours of cooling.

Here is a suggestion for demonstrations: After opening and demonstrating the Frosty Towel with your clients, place the towel in a zip lock bag and keep it refrigerated so you can show it several times over.

When finished with the Frosty Towels wash and dry them to be used for years to come as a sports towel, wash cloth or shop cloth making tons of brand impressions.

The Polar Fresh Frosty Towel can be CUSTOMIZED with your logo. We can customize the package, the towel, or both. All Frosty towels come as a standard white towel. We have additional colors from which to choose for the 12 x 12. We can embroider or add an interwoven label to the Frosty Towels. In addition, we have specialized scents available. All customized orders require minimum purchases and additional time. Please check the spec sheet or price sheet for details.
